May faces moment of truth in cabinet clash over Brexit draft

Deal agreed with Brussels • Ministers summoned to view text • Sceptics denounce pact

GEORGE PARKER — LONDON
ALEX BARKER — BRUSSELS

Theresa May faces the most dangerous moment of her premiership today as she challenges her divided cabinet to back a draft Brexit treaty and attempts to face down Conservative Eurosceptics.

The cabinet meeting comes after negotiators in Brussels ended months of talks by agreeing Britain's terms for leaving the EU. Mrs May now has to sell it to her cabinet and parliament.

Even before they had seen the final text, which runs to more than 400 pages, Tory Brexiters and the Democratic Unionist party, which props up Mrs May's government, warned they would vote the deal down.

But pro-Europeans in the cabinet said they were "optimistic" Mrs May could overcome her critics, paving the way for a special European summit on November 25 to ratify Britain's exit terms.

Downing Street confirmed that a "draft agreement" had been reached in Brussels and the cabinet would meet at 2pm today. The withdrawal accord, struck more than two years after the Brexit referendum, sparked a frenzied round of political activity in London as Mrs May prepared the ground for the crucial cabinet meeting.

Ministers were summoned individually into Downing Street last night to be briefed on the terms of the treaty, including the provisions to avoid a hard border in Ireland. Ratification of the accord would allow the UK a smooth departure from the EU on March 29, preparing the way to further negotiations on the final relationship during a 20-month transition period.

Business leaders were also being invited to Downing Street, as Mrs May prepared to unleash an intensive lobbying operation in support of a deal.

Mrs May hopes that some nine Eurosceptic ministers will finally accept the need to agree a deal, in spite of its flaws. Hardline Brexiters pleaded with ministers to quit but Iain Duncan Smith, the

Julian Smith, the chief whip who will have to steer the deal through the Commons, arrives at No 10 last night.

pro-Brexit former Conservative leader, acknowledged that a mutiny by Eurosceptic cabinet ministers might be limited, saying that their "spines do not yet meet their brains".

Boris Johnson, the former foreign secretary, said the deal, which would see

Britain following EU rules on topics including the environment, state aid and employment law, was "vassal state stuff" and that he would vote against it.

Eurosceptic ministers have been warned by Mrs May that unless a deal were approved this month, the government would have to start preparations for a potentially economically disastrous "no-deal" exit.

Following news of the accord, sterling surged against the dollar, trading 1.4 per cent higher on the day at \$1.3032. Stocks also rallied, with the FTSE 100 up 0.7 per cent.

The draft exit treaty is understood to include a UK-wide customs backstop

plan to avoid a hard border in Ireland, keeping Britain in the customs union until a final trade deal is agreed between the two sides.

Brussels agreed the proposal in a concession to London but, in exchange, it is thought to have insisted that Northern Ireland remain in a "deeper" relationship with the EU on the customs and regulatory side under the backstop.

Officials in Brussels said a meeting of EU ambassadors was expected today to discuss developments, with a further meeting of EU ministers scheduled for Monday if London approved the text.

The paradox is intrinsic to Brexit: we can only secure continuity of frictionless trade by complying with the rules but without a say in them once the UK has left

Call for action as Yemenis suffer on economic front

'Economic warfare' is causing suffering in Yemen that rivals even the impact of aerial bombardments. The UN special envoy has called on the central bank to avert a famine by pumping money into the economy. A currency collapse and the refusal by the Saudi-backed government to pay civil servants in areas controlled by Iran-aligned Houthis has brought despair. 'Hunger kills more people because we cannot flee it,' says one father of five.

Tech giants spend \$115bn on buybacks as investors lap up Trump tax windfall

RICHARD WATERS — SAN FRANCISCO
ANDREW EDGECLIFFE-JOHNSON
NEW YORK

The five US tech companies with the largest cash piles took advantage of President Donald Trump's tax reforms to spend more than \$115bn in the first three quarters buying their own stock.

The share buybacks so far this year by Apple, Alphabet, Cisco, Microsoft and Oracle, after the tax change came into force at the end of 2017, are nearly double what the companies spent in the whole of last year, making investors some of the biggest beneficiaries of a plan that was billed as a boost to US jobs.

They increased capital investment by 42 per cent compared with the same period last year, to \$42.6bn, according to Financial Times calculations.

Tech groups have also led a parallel

trend, identified in a report yesterday by Moody's Investors Service, for US companies to channel much of their tax windfalls into paying down debt.

The data add to the debate on the extent to which the tax reforms have boosted investors, rather than stimulating investment and benefiting workers.

Tech companies had been sitting on some of the largest cash piles, almost all of it stranded offshore, where it escaped an immediate tax. Last year's Tax Cuts and Jobs Act brought these reserves into the tax net but at a reduced rate — freeing companies to use the money rather than leave it to continue to pile up.

"Most companies are using cash to buy back stock and make acquisitions, rather than invest in new facilities," said Walter Price, a tech investment manager at Allianz.

Apple, with the largest offshore cash

and investment holdings, said after the passage of the tax bill it would make a "direct contribution" to the US economy of \$550bn over the next five years.

Since then, it has lifted its capital spending to \$14.5bn, an increase of 14 per cent from the year before. But its buybacks have soared to \$62.6bn in the first nine months of 2018, nearly three times the same period the year before.

Investors and analysts said repatriated cash was also contributing to renewed investment. But planning new facilities took longer to execute.

"There's a strong correlation between tax reform and capital spending," said Youssef Squall, internet analyst at SunTrust Robinson Humphrey, pointing to Google and Facebook, which plan to spend a combined \$37bn this year, up from just under \$21bn in 2017.

Ethnic Diversity in Technology

Introduction and methodology

This is the first time the FT and Inclusive Boards have published a Top 100 list of black and minority ethnic leaders in technology.

The tech sector has long suffered from a lack of diversity, including a low rate of ethnic minorities that hold leadership positions. In the UK almost

three quarters of boards and 71 per cent of senior executive teams in the top tech firms have no BAME members, according to a report being released today by Inclusive Boards.

This list highlights those making a positive change. Candidates were initially identified by Inclusive Boards,

a recruitment agency that helps organisations to diversify. Researchers scanned the leadership of the top 500 tech companies by revenue and the top 50 fastest growing tech companies in the UK and Europe.

The criteria used for nominees included their holding a senior role,

having a sphere of influence within their organisation — or across a community — and driving progress in the sector outside their professional roles.

A call for nominations attracted additional candidates beyond Inclusive Boards' research. After the

researchers interviewed individuals on a long list, the judges picked the top 100, presented here in alphabetical order. The judges (listed below) also chose the top 10 most influential BAME tech leaders and named 10 highly commended disrupters, presented on the following page.

Most influential BAME leaders in technology

Name	Position and Organisation	Gender
Abadesi Osunsade	Founder, speaker and mentor, Hustle Crew	Female
Abdul Haseeb Basit	Co-founder, Elipses Chairman, Yielders	Male
Adah Parris	Coach, Djembe Consulting Facilitator, #IamRemarkable	Female
Ade Akin-Aina	Talent acquisition leader, Hostmaker	Female
Adnan Ebrahim	Founder and chief executive, Car Throttle	Male
Adrian Joseph	Head of AI for financial services UK and EMEA, EY	Male
Akosua Annobil	Founder, AB2020 Founder, Tech in Ghana	Female
Alex Fefegha	Co-founder and head creative technologist, Comuzi	Male
Amali de Alwis	Chief executive, Code First: Girls	Female
Andrew Ko	Co-founder and chief executive, Personalize	Male
Andy Ayim	Managing director, Backstage Capital Accelerator	Male
Anish Patel	Digital transformation lead, NatWest Markets	Male
Anjali Ramachandran	Director, Storythings	Female
Anouska Ruane	Communications director, Facebook UK, Ireland and Africa	Female
Anushka Sharma	Founder, Naut Product manager, Nasa's FDL	Female
Aseem Sadana	Executive vice-president, IIMobile	Male
Ashleigh Ainsley	Founder, Colorintech	Male
Baz Khuti	Founder and chief executive, QIO Technologies	Male
Bill Liao	Founder, CoderDojo Trustee and chair, Social Tech Trust	Male
Chai Rajebahadur	Head of Europe, Zensar Technologies	Male
Chantelle Bell	Co-founder, Syrona Women	Female
Chelsea Chen	Co-founder, Emotech	Female
Dara Nasr	Managing director, Twitter UK	Male
Deborah Okenla	Founder and community lead, YSYS	Female
Dee Sellayah	Enterprise account director, LinkedIn	Female
Dhruv Ghulati	Chief executive and co-founder, Factmata	Male
Dhruv Patel	Chief executive, Nisai Group	Male
Dupsy Abiola	Head of global innovation, International Airline Group	Female
Eileen Burbidge	Partner, Passion Capital Fintech envoy, UK Treasury	Female
Einstein Ntim	Founder, Enabled AI Partner, GSE	Male
Eric Collins	Chief operating officer, Touch Surgery	Male
Founding Members	UKBlackTech	M&F
Gautam Samanta	Head of Europe and global head of BFS, NIIT Technologies	Male
Geoffrey Williams	Global head of Diversity and inclusion, Thomson Reuters	Male
Gerald Charles	Global IT operations and strategy vice-president, Under Armour	Male
Hephzi Tagoe	Co-founder and chief executive, GHScientific Founder, HANAT	Female
Husayn Kassai	Co-founder and chief executive, Onfido	Male
Ian Forrester	Senior producer, BBC R&D	Male
Ibrahim Kamara	Co-founder and editor-in-chief, GUAP	Male
Ishani Patel	Co-founder, Lantum Mentor, Royal College of GPs	Female
Ismail Ahmed	Founder and executive chairman, WorldRemit	Male
Ismail Amla	Managing partner, IBM services in North America	Male
Ismail Jeilani	Co-founder, Scoodle	Male
Jacqueline de Rojas	President, TechUK President, Digital Leaders	Female
Jag Singh	Managing director, Techstars	Male
Jan Sinclair	Global immigration leader of MAO, IBM	Female
Jeremy Boon	Analytics and information management chief of staff, Deloitte UK	Male
John Michael	Chief executive, iStorage	Male
Jonathan Akwue	Executive vice-president, Publicis Groupe	Male
Joyce Adeluwoye-Adams	Global director of diversity and inclusion, King	Female

Most influential BAME leaders in technology
